LYMAN AND DARNELL'S

Elementary Algebra

By ELMER A. LYMAN, Professor of Mathematics, Michigan State Normal College, Ypsilanti, Mich., and ALBERTUS DARNELL, Head of the Department of Mathematics, Central High School, Detroit, Michigan.

SIMPLICITY and completeness are the distinctive features of this new algebra for secondary schools. It meets the requirements of courses of study in various States and of the College Entrance Examination Board. Unduly puzzling exercises are omitted; non-essentials have been strictly eliminated; easy oral drills help the pupil to understand the subject.

Its problems include applications to geometry, physics, agriculture, commerce, and various interests of everyday life.
